Poli-MAX™ reinforcement

- Highly effective sound insulation, probably the quietest Spas available – take a spa whenever it pleases you and it won't annoy the neighbours!

- Highly effective heat insulation – which means a longer time between heating intervals - reduced electric ity costs!

- Ecologically sound product, easily degradable, (unlike fibreglass it does not give off any hazardous styrol gas). Thus it is not classes as hazardous and meets all relevant EU standards.

Acrylic outer surface with antimicrobial treatment.

ABS polymer layer to further increase impact resistance and strength.

Medium density robotically applied polyurethane for added strength plus acoustic and thermal insulation. The cushioned no-stress support pads are embedded into this layer.

POLYFOAM INSULATION WITH HEAT-MIRROR FOIL

All the internal surfaces of the cabinet and floor pan are completely covered in our heat mirror insulated foil. This not only stops precious heat energy from escaping, but actually reflects the waste heat from the pump motors back into the plumbing. This “free” heat energy is therefore transferred back into the spa water, significantly reducing running costs. We call this dynamic reflective barrier insulation.

WPS (WELLIS POLYSTYROL) CABINET FRAME IMMORTALITY FOR THE SPA CABINET'S FRAME!

The special polymer ensures exceptional stability and life for the Spa's structural frame – protecting and extending the life of your investment even further.
