SPA FACILITIES CLIMATE CONTROL CHART

As Fluidra understands it today, the term wellness covers the concept of the overall feeling of health that brings the body, mind and spirit into balance. The term comes from the words “well-being”, “fitness” and “happiness”. Thanks to the warm environment in the heat area in conjunction with facilities such as a sauna, salt room and the chromotherapy features that can be added to them, stress is reduced, the aspect of our skin improves, the ageing of skin is delayed, and different illnesses of the respiratory tract and allergies can be treated, as they trigger a mechanism in our bodies whose action has clear positive effects.

Our planet is changing and it's changing fast.

Fluidra's mission is to **protect the world's resources.
We guarantee that all the wood we use in our products grows back again.**
